Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR Part 60, Subpart A, as well as for the specific requirements at 40 CFR Part 60, Subpart K. This includes submitting initial notifications and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Facilities with petroleum liquids storage vessels.

Respondent's obligation to respond: Mandatory (40 CFR Part 60 Subpart K).

Estimated number of respondents: 69 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 321 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$32,200 (per year), which includes \$0 for both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is a substantial decrease in burden from the previous ICR due to a decrease in the number of sources. Many storage vessels have been modified and become subject to Subpart Kb. Based on information obtained from the Agency's 2011 Petroleum Refinery ICR, the number of facilities subject to this regulation has decreased from 220 to 69. The update in source count results in a decrease in the labor hours, labor costs, and number of responses.
